Summary

Backend and AI engineer building **Python REST APIs** and **LLM-powered applications**, with hands-on **RAG pipelines**, tool-calling agents, and multi-agent workflows (LangChain, LangGraph, Agentforce). Experienced with PostgreSQL, Docker, and AWS, and published in CI/CD for ML. Comfortable owning features end to end, from design and testing to production debugging in Agile teams.

Technical Skills

Languages: Python, SQL, Java, JavaScript (Node.js), C, Apex
Backend & APIs: REST API Design, Flask, Django, Spring Boot, Event-Driven Design, Unit & Integration Testing
LLM & AI Systems: LLM APIs, Prompt Engineering, Tool Calling, RAG, AI Agents, LangChain, LangGraph, Multi-Agent Orchestration, Agentforce
Databases: PostgreSQL, MongoDB, Schema Design
Cloud & DevOps: AWS (Kinesis, Lambda, S3), Docker, CI/CD Pipelines, Git/GitHub
Frontend & Practices: React, HTML, CSS, Agile/Scrum, Peer Code Review, Root Cause Analysis

Experience

Appstrail Technologies Feb 2026 – Present
Software Development Intern *Bangalore, India*

- Built and debugged multi-step **AI agent** workflows (Agentforce) with tool calling, state management, and grounded external-system lookups to automate customer-facing processes in production.
- Designed and shipped **REST APIs** and backend services (Apex classes, triggers, handlers) that connect agents to business data, with test-class coverage and root cause analysis of production defects.
- Built **Lightning Web Components** on top of these services for internal tooling, owning features from requirements through testing and deployment.
- Worked in an **Agile/Scrum** team with peer code reviews, translating requirements into technical solutions through rapid design-test-deploy cycles.

Projects

Agentic RAG Pipeline for Document Q&A | *Python, LangChain, LangGraph, LLM APIs*

- Built a multi-agent **RAG** system with embeddings-based retrieval, reranking, and tool-calling agents (LangChain, LangGraph) that synthesize source-grounded answers over large document corpora.

Cloud-Based CI/CD Pipeline for ML in Healthcare | *AWS, Docker, CI/CD, MLOps – Published Research*

- Designed and evaluated an **MLOps** pipeline automating build, test, versioning, and deployment of a breast-cancer prediction model, covering the full model lifecycle from training to release.

Real-Time Stream Analytics on AWS | *AWS Kinesis, Lambda, S3, Python*

- Designed a scalable, fault-tolerant **event-driven** pipeline for real-time data ingestion and processing, delivering insights through analytics dashboards.

Publications

- A Cloud-Based CI/CD Pipeline for Machine Learning in Healthcare: Breast Cancer Prediction
- Safe Ride AI Helmet System

Education

KL University 2022 – 2026
B.Tech in Computer Science & Engineering – CGPA: 9.17/10

Narayana Junior College 2020 – 2022
Intermediate (MPC) – 757/1000

Certifications

Salesforce Certified AI Associate
5-Day AI Agents: Intensive Vibe Coding
Red Hat Certified Enterprise Application Developer
Aviatrix Certified Engineer – Multicloud Network Associate
Automation Anywhere Certified Essentials RPA Professional
