

NEMALA YASH RAJ

Vijayawada | yashrajnemala@gmail.com | +91 79972 44791 | LinkedIn | GitHub | Portfolio

Profile

- **AI/ML engineer** with hands-on experience building agentic AI systems, RAG pipelines, and LLM-integrated applications. Deeply interested in safe, reliable AI deployment — aligned with Anthropic’s mission of building AI systems that are helpful, harmless, and honest. Skilled at integrating large language models into real-world workflows through tool use, multi-agent orchestration, and Agentforce-based automation. Strong background in full-stack development, cloud infrastructure, and applied deep learning.

Education

KL University

B.Tech in Computer Science & Engineering

CGPA: 9.2 / 10

Narayana Junior College

Intermediate (MPC)

Score: 757 / 1000

A.A.N.M & V.V.R.S.R EM High School, Gudlavalleru

Secondary School Education

CGPA: 8.8 / 10

Technical Skills

- **Agentic AI & LLMs:** RAG Pipelines, LLM Tool Use, Multi-Agent Orchestration, Prompt Engineering, Agentforce (Salesforce), Claude API
- **AI/ML:** Machine Learning, Deep Learning, Artificial Neural Networks, TensorFlow, PyTorch, Scikit-Learn
- **Programming Languages:** Python, Java, C
- **Backend Technologies:** Django, Node.js, Flask, Spring Boot
- **Frontend Technologies:** React, HTML, CSS, Bootstrap
- **Databases & Cloud:** PostgreSQL, MongoDB, AWS (Kinesis, Lambda, S3), Vector Databases
- **Developer Tools:** GitHub, Postman, VS Code, Docker

Projects

- **Agentic RAG Pipeline for Document Q&A:** Built a multi-agent Retrieval-Augmented Generation system using LLMs and vector databases to answer queries over large document corpora. Implemented tool-calling agents for retrieval, reranking, and response synthesis with context grounding.
- **Sonar Underground Detection Web Application:** Developed a deep learning-based Flask web application to classify road surface images using VGG, ResNet, and Autoencoder models. Compared optimizer performance and visualized prediction confidence via interactive bar graphs.
- **Plant Disease Classification System:** Built an image classification pipeline using AlexNet and a custom VGG architecture on the PlantVillage dataset. Applied data augmentation and hyperparameter tuning to achieve over 95% accuracy in disease detection.
- **Real-Time Stream Analytics on AWS:** Designed a scalable event-driven pipeline using AWS Kinesis, Lambda, and S3 for real-time data ingestion and processing. Generated analytics dashboards to surface streaming insights.

Publications

- A Cloud-Based CI/CD Pipeline for Machine Learning in Healthcare: Breast Cancer Prediction. ResearchGate Link

Certifications

- **Salesforce Certified AI Associate** (incl. Agentforce & Einstein AI) — Credential Link
- **Automation Anywhere Certified Essentials RPA Professional** — Credential Link
- **Red Hat Certified Enterprise Application Developer** — Credential Link
- **Aviatrix Certified Engineer — Multicloud Network Associate** — Credential Link

CERTIFICATIONS

- **5-Day AI Agents Intensive — Vibe Coding Course (Kaggle)**
